Tips on observing your symptoms and reporting them for Homeopathic Purposes (if it helps, write/outline on the back of the page) These are the kinds of questions you will be asked in the initial consultation:

- 1) Describe in detail, the onset of your symptoms. Outline any related mental, emotional or physical symptoms and/or any external conditions that may have contributed to your state of being at that time.
- 2) Outline all previous illnesses. Include any childhood diseases and if applicable, any lasting effects from these ailments. Were there any extensive therapies employed in the healing of these conditions? Did you have any reactions or long-term side effects to any such therapies?
- 3) Describe any symptom you are experiencing in terms of its location in the body. Does this symptom shift from one place in your body to another? Are there related symptoms elsewhere in the body? Particular sensations associated with the symptoms? How does it feel/look/smell/taste? Is there anything that makes the symptom unique, striking or unusual? If pain is involved, describe the pain you endure such as a dull ache vs. a stabbing pain, a constant or periodic pain, etc. Describe the onset of your pain; slow vs. sudden? How intense is the pain (on a scale of 1 to 10 - 10 being the most painful)?
- 4) Write down when your symptoms feel better or worse: time of day/ when hot or cold/ month/ season/ before or after eating / sleep/ moving / resting/ certain positions / when occupied / specific mental or emotional states.
- 5) Are you affected in any way by different kinds of weather? Dryness / humidity/ approaching storms/thunderstorms / frost/ cloudiness / low or high altitudes / being by the seashore.
- 6) Urination (if of concern): color / odor / sediment / quantity / frequency / urgency.
- 7) Stool (if of concern): color/ odor/ sediment / quantity/ frequency / urgency.
- 8) Menses: length of cycle / length of period / significant pain associated with menses / nature of the flow / clotting / cramping / PMS / mood swings / bloating / swollen tender breasts / cravings / vaginal discharge with or without menses.
- 9) Sex: Desires / aversion / painful intercourse / vaginal dryness / impotency.
- 10) Perspiration: profuse / scanty (little) / odour.
- 11) Body Temperature: Hot vs. Cold body type / hot or cold hands or feet / hot flashes.
- 12) Sleep: do you wake up at night? What time? How do you feel in the morning on rising? What position do you sleep in the most? Are parts of the body covered or exposed when sleeping? What kinds of dreams do you have? Do you have any recurring dreams or nightmares? Do you have trouble falling asleep and/or staying asleep?
- 13) What motivates you in life? Are there lasting traits from childhood that are still an issue today? Are there running themes in your life? Eg: "All my life I've been..." How would others describe you? How do you deal with change in your life? Do you need structure in your life?
